Student information

- Name: Inho Kim

- Major: Computer Science and Engineering

- ID: 20161577

Application design

Title

> The twin asteroids

Target users

Designed for children who like space and celestial objects.

Features

- Asteroid movement

Move your mouse over the canvas to move the red asteroid. The blue twin asteroid will follow the red asteroid.

- Background change

When moved the asteroid fast enough, the background will change, clearing the paths of the asteroids.

Visual concepts

You may create drawing with the asteroids.
